

# Transaction Central™

Centralized payment-processing engine

Expand your capabilities and grow your business with Advanced Payment Technologies

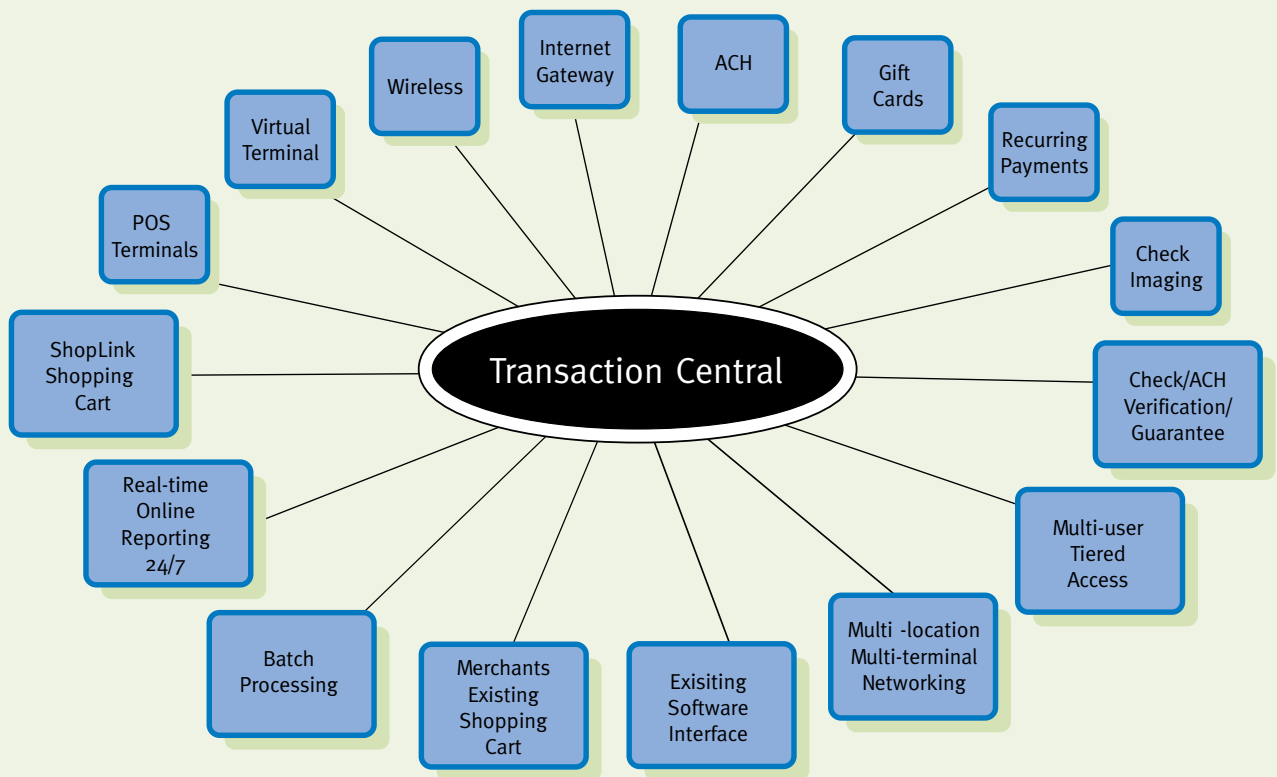

**TRANSACTION CENTRAL is a Web-based centralized payment-processing engine that offers comprehensive, flexible and user-friendly processing solutions for merchants of all sizes. Transaction Central allows your customers to accept payments from multiple locations anywhere in the world at anytime, instantly networking all devices, including POS, e-commerce, software and wireless. Transactions of all types, including e-check, ACH and recurring payments can be entered over the counter, over the phone or over the Internet with this single, integrated system – and can be accessed in real-time, 24 hours a day, seven days a week via the Internet.**

This innovative proprietary product enables you to measurably grow your business by opening doors to previously untapped vertical markets and making this complete processing technology with big merchant functionality available to small and mid-sized merchants.

Transaction Central has all the functionality of an electronic countertop terminal. Transactions are processed online, enabling any PC or wireless handheld device to be converted into a traditional POS terminal with fully integrated card swipe technology.

- Fully-integrated
- Comprehensive
- Flexible
- Easy-to-use
- End-to-end solution

### Capabilities include:

- Check imaging,
- Compatibility with existing software,
- ACH service,
- Recurring payments,
